Response to Amendment

This office action is in response to the amendment filed on 7/14/2004.

Claims 1-59 have been canceled. Claims 60-86 are newly added,

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 60 -66, drawn to interactive smart card processing, classified in class 725, subclass 6.
- II. Claims 67-72, drawn to digital device access and control, classified in class 713, subclass 159.
- III. Claims 73-78, drawn to database or data structure application, classified in class 707, subclass 104.1.
- IV. Claims 79-86, drawn to remote data accessing, classified in class 709, subclass 217.

The inventions I, II, III and IV are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable.

Art Unit: 2161

In the instant case, invention I (interactive smart card processing) has separate utility such as using smart card for interactive transaction processing. Invention II (digital device access and control) has separate utility such as access and control multiple digital devices via communication link to a network. Invention III (database or data structure application) has separate utility such as analyzing data from multiple devices by tracking the usage data pattern. Invention IV (remote data accessing) has separate utility such as accessing credit card information stored on the remote media.

Because these inventions are distinct and search groups I, II, III and IV are not required to be simultaneous, restriction for examination purposes as indicated is proper.

A telephone interview has been conducted by the examiner (Susan Chen) and applicant attorney (Brent E. Vecchia) on 03/14/2005. The examiner has requested applicant representative to make an election of the above recited groups, in reply, the applicant selected group 1 (claims 60-66) for continuing examination without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

Art Unit: 2161

must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 60-66, are rejected under 35 U.S.C. 102(e) as being anticipated by Sehr (U.S. Patent No. 6,386,451).

As to claim 60, Sehr discloses an apparatus comprising:

- a) a portable medium [e.g., the passenger card 11, Fig. 1 and associated texts];
- b) a machine-readable medium of the portable medium [e.g. the smart card, col. 6, lines 19-20];
- c) a template database including a plurality of user preference templates that each correspond to a different electronic device [e.g., the distributed database 10, 20, 30, Fig. 1, col. 5, lines 14-26; col. 6, lines 26-54].

As to claim 61, Sehr further discloses the template database is stored on the machine-readable medium [e.g., col. 46, lines 45-50].

As to claims 62-63, Sehr further discloses the template database comprises an identification and user history template [e.g., col. 6, lines 3-18].

As to claim 64, Sehr further discloses the apparatus comprising instructions stored on the machine-readable medium that if executed cause a microprocessor of the portable medium to generate a template [e.g., col. 6, lines 19 – line 54].

As to claim 65, Sehr further discloses the portable medium comprising a smart card [e.g., col. 6, lines 19-20].

As to claim 66, Sehr further discloses the machine-readable medium having flash memory [e.g., the memory of claim 2, col. 45].

Response to Amendment

Applicant's arguments with respect to claims 31-34 and 36-59 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2161

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
